

SOFTWARE PROFESSIONALS, INC. (SPI)

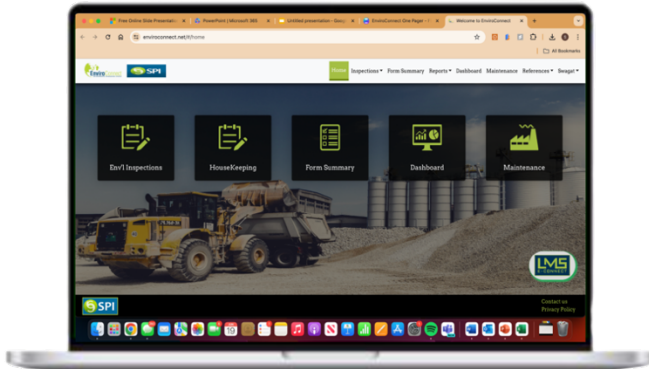

Environmental Management System

EnviroConnect is a comprehensive solution for handling environmental data and generating reports. With our innovative software, you can manage data, maps, photos, and more. We work collaboratively with our clients nationwide providing an environmental management information system that reduces cost and improves regulatory government and environmental compliance with measurable metrics and compliance.

A Useful and Accessible Asset

Your organization generates reams of useful environmental information in many formats and systems, including spreadsheets, electronic files, and hardcopy reports. **EnviroConnect** is the means for consolidating disparate data into one repository, making it more accessible and far more useful.

Field Tested and Approved

Software Professionals, Inc. has implemented **EnviroConnect** for a multinational company that produces and markets cement and ready mix concrete.

SPI Has the Answers to Your Questions:

Is environmental compliance a high priority in your organization?	Could you benefit from standardizing and streamlining your processes?
Do you struggle with tracking incidents, violations, and compliance issues?	Are you spending too much time and money managing your data?
Do you feel like you have control over your environmental data?	Is your company proactive or reactive?

What Our Clients are Saying:

- Always available from anywhere
- No 3rd-party software required
- Alerts of potential issues
- Preformatted and custom reports
- Storage of virtually any type of data
- Email to/from the system
- Easy imports and exports
- Automatic routing of reports
- Monthly fees versus a large upfront purchase
- Data verification
